# Installation Guide for Krupa's Foods

Note: iPhone, iPad, Mac, or Vision Pro is required to test this app.
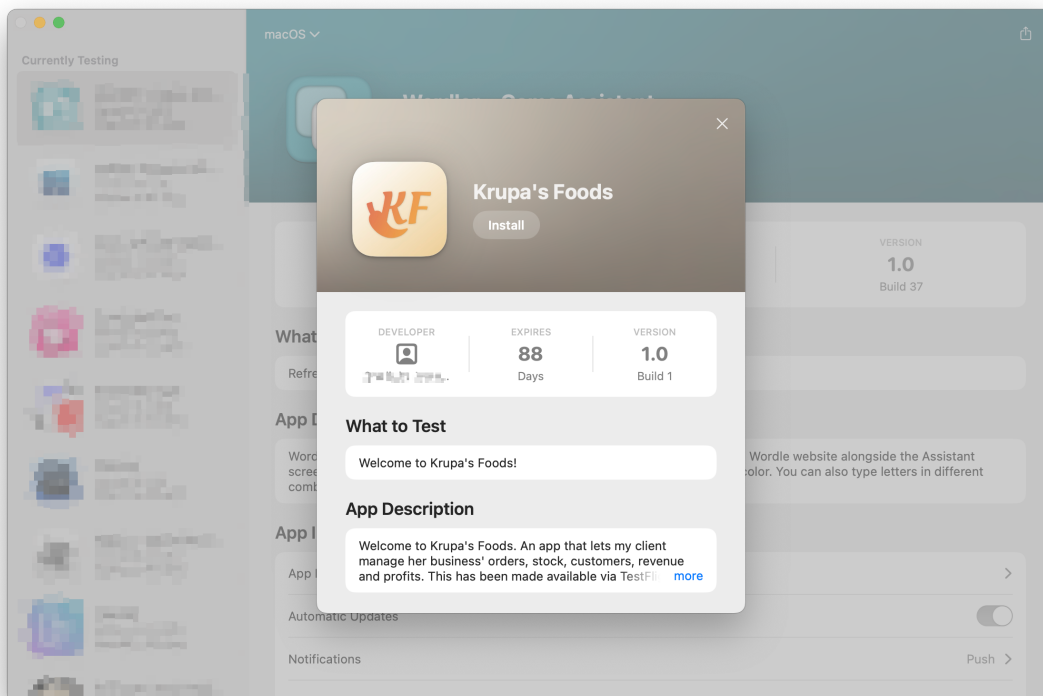

Method 1: Direct Installation via TestFlight (Recommended)

Step 1: Install TestFlight on your iPhone, iPad, Mac or Vision Pro.
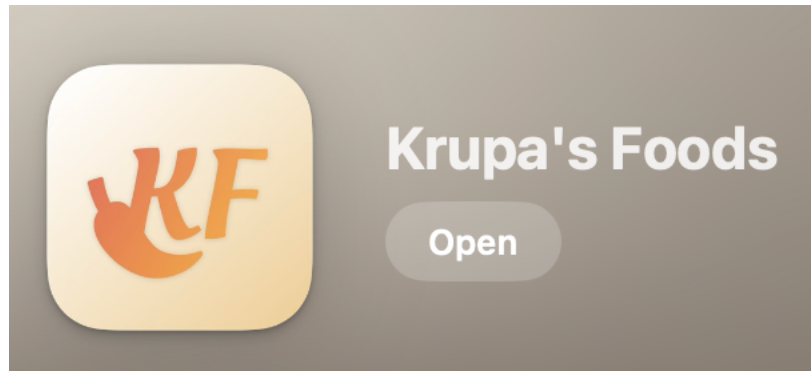

[Install via the App Store](#)

Step 2: Open TestFlight link included on Cover Page and Click "Install" in the TestFlight window.

Step 3: Click <u>Open</u>

Done!

Method 2: Build from Source

Note: Requires a Mac Computer running macOS 14.5 or later, with Xcode 16.0 or newer. Generative AI features will not be available when using this method for security reasons. Use *Method 1* to test AI-powered autofill functionality.
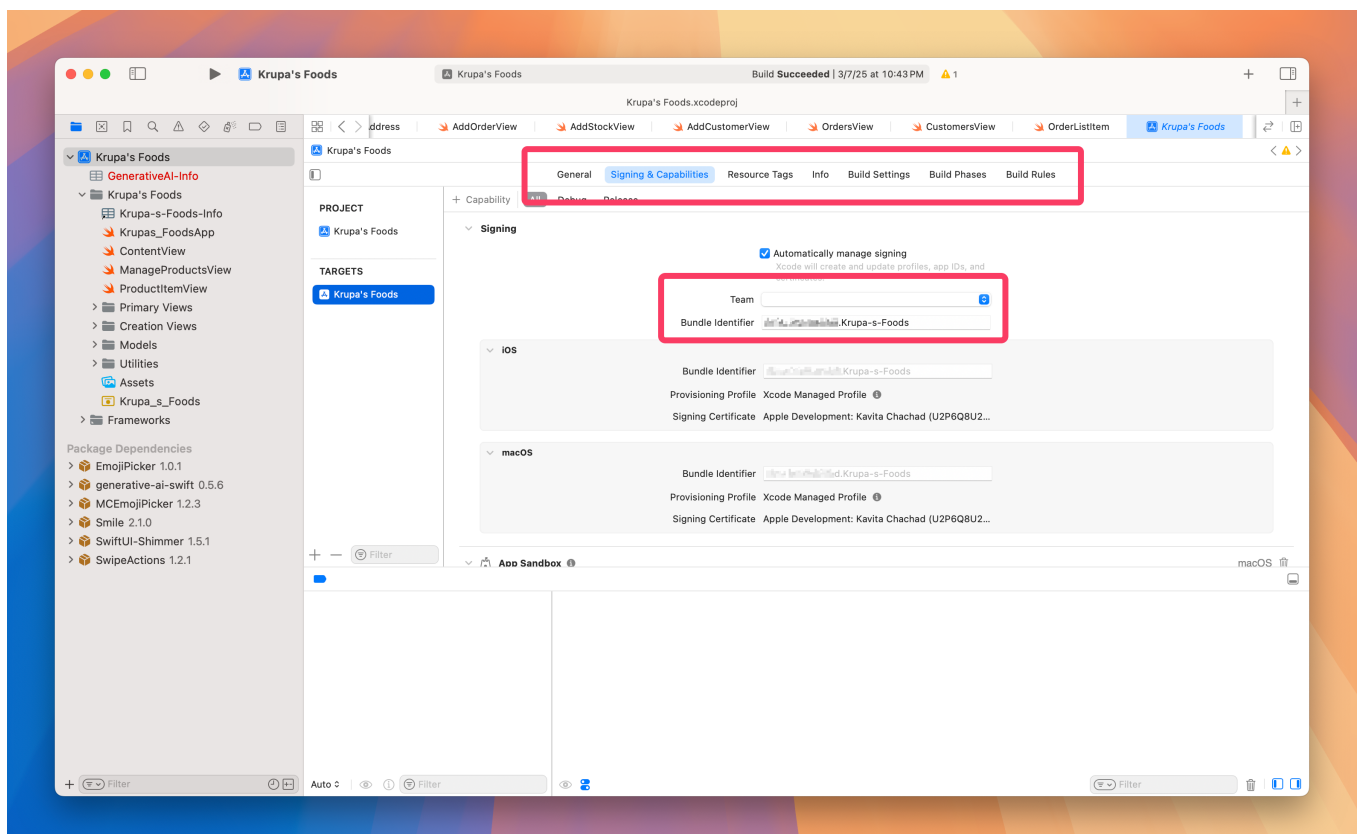

Step 1: Unzip the KrupasFoods-main.zip file included in the Product Folder

**Step 2:** Open `Krupa's Foods.xcodeproj`

Step 3: Set up App Signing

Please navigate to "Krupa's Foods" on the top left of your Xcode Window. Choose the Krupa's Foods Target → Signing and Capabilities.

Choose your own Development Team, and Change the Bundle Identifier to one of your choice.

Step 4: Choose a device to run the app on.

Step 5: Click ▶ to Build and Run the Project. You may have to wait for Package Dependencies to load.

Done!
